DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Dozier et al, US patent No. 5,751,346.

Dozier et al disclose an image and information security comprising: means for recording images related to transactions and security in a bank, the transaction images are provided by teller cameras in a banking operation to have an image saved which shows the person who made a customer transaction so that at a later time there can be a verification of whether this transaction occurred and an image to verify the identity of the person who made the transaction; a receipt printer 46, and an electronic printer record is produced, the record is transmitted through line 52 and an interface circuit 86 to a line 92 which provides the record to the video and data channel selector 12; the printer record is received by the data switch 136 which notifies the existence of such a record via line 138 to the processor 132; each of a plurality of records received from the printers is transmitted through the line 140 to the serial buffer 142; a buffer for storing the plurality of records, wherein the buffer is controlled by the processor 132 and a computer 16. The system of Dozier et al is capable of performing all the functional and the method steps as set forth in the claims.

Response to Arguments

3. Applicant's arguments with respect to claims 1-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
